TO: Board of Directors of T.I.T.L.

FROM: William L. Steele

SUBJECT: Report for the Month of June, 1974.

STAFF AND FACILITIES

We had our first potentially serious breakdown in a long time this month. A fan motor control on the condensing unit serving the humidified spaces failed. Fortunately, the part was available locally; otherwise, we might have lost several weeks smoking time instead of a few days.

The staff remains unchanged.

ACTIVITIES

Testing of the market sample is still proceeding. We expect to complete testing by the middle of the month with a report to follow by the end of July.

The FTC lab is still testing. They would like to have a report completed at the laboratory level sometime during August. Even though not finished with the current test, they are going ahead with

preparation for the next pick-up. Requests for brand information have gone out or are in the porcess of going out to all companies. The speed of the replies will probably determine how soon the pick-up can start.
